## \_\_\_\_\_ Public Library Acquires Digital Map Collection

(City, State – Month Day, Year) – The \_\_\_\_\_ Public Library is pleased to announce that it has recently added *AtoZ Maps Online* to its online reference offerings. This new library resource is the world's largest database of downloadable, royalty-free maps for student and library patron use. More than 100,000 maps are available in 48 categories.

“Downloadable maps are very popular at the library, but in the past, we've never been able to offer one source for such a huge collection covering so many different categories. We're very excited to offer this database to our patrons,” says \_\_\_\_\_, reference librarian at \_\_\_\_\_ Public Library.

According to the library, anyone can access *AtoZ Maps Online* using the library's computers, or from anywhere in the world from the library's portal at [www.\\_\\_\\_\\_\\_.org](http://www._____.org) with their library card. Users will find world, regional, country, and state maps as well as environmental, climate, antique and other maps. The database also contains extensive teaching tools for educators with lesson plans. It even has interactive video guides for state, country, and world geography.

*AtoZ Maps Online* was designed for libraries, educators, businesses, travelers and anyone who needs a royalty-free map for school and other projects.

Offering *AtoZ Maps Online*, a product of *World Trade Press, the Global Knowledge Company*, is an example of the \_\_\_\_\_ Public Library's mission to offer patrons increased accessibility to a wide range of knowledge and tools.
